Lined ball valve

| | |
|------------------------|---|
| Size | 15mm~300mm (0.5"~12") |
| Working pressure | 0.1mbar~16 bar |
| Temperature range | -20° C ~ 200° C according to working conditions, other temperatures on request. |
| Design and Manufacture | API 608 DIN 3357 JIS B2071 |
| Face to Face | ASME B16.10 DIN 3202 JIS B2002 |
| Flange Ends | ASME B16.5 DIN 2532 JIS B2212 |
| Visual Inspection | MSS Sp54 |
| Testing | API 598 DIN 12569 JIS B2003 |
| Pressure & Temperature | ASME B16.34 |
| Operator Type | Lever/ Gear/ Pneumatic/ Electric |
| Spark testing | 14kv |

■ Lined ball valve

The ball valves are ideally suited for corrosive applications, requiring reliable performance, tight shutoff, and constant torque. The valves successfully handle a multitude of corrosive applications in industries such as chemical, petrochemical, pharmaceutical, pulp and paper, foundries and mining like sulphuric acid, etc.

Lined butterfly valve

| | |
|------------------------|---|
| Size | 50mm~900mm (2"-36") |
| Working pressure | 0.1mbar~10bar |
| Temperature range | -20° C ~ 200° C according to working conditions, other temperatures on request. |
| Design and Manufacture | API609 DIN EN1092 JIS B2032 |
| Face to Face | ASME B16.10 DIN EN558.1 JIS B2002 |
| Flange Ends | ASME B16.5 DIN 2532 JIS B2212 (150lb, 10K, Pn10) |
| Visual Inspection | MSS Sp54 |
| Testing | API 598 DIN 3230 JIS B2003 |
| Pressure & Temperature | ASME B16.34 |
| Operator Type | Lever/ Gear/ Pneumatic/ Electric |
| Spark testing | 14kv |

Lined butterfly valve

The butterfly valves'special feature is the seat ring design. The interference between the disc and the raised central area of the seat ring shuts off the flow completely. The resilient elastomeric seat cushion ensures reliable shut-off for the life of the valve.

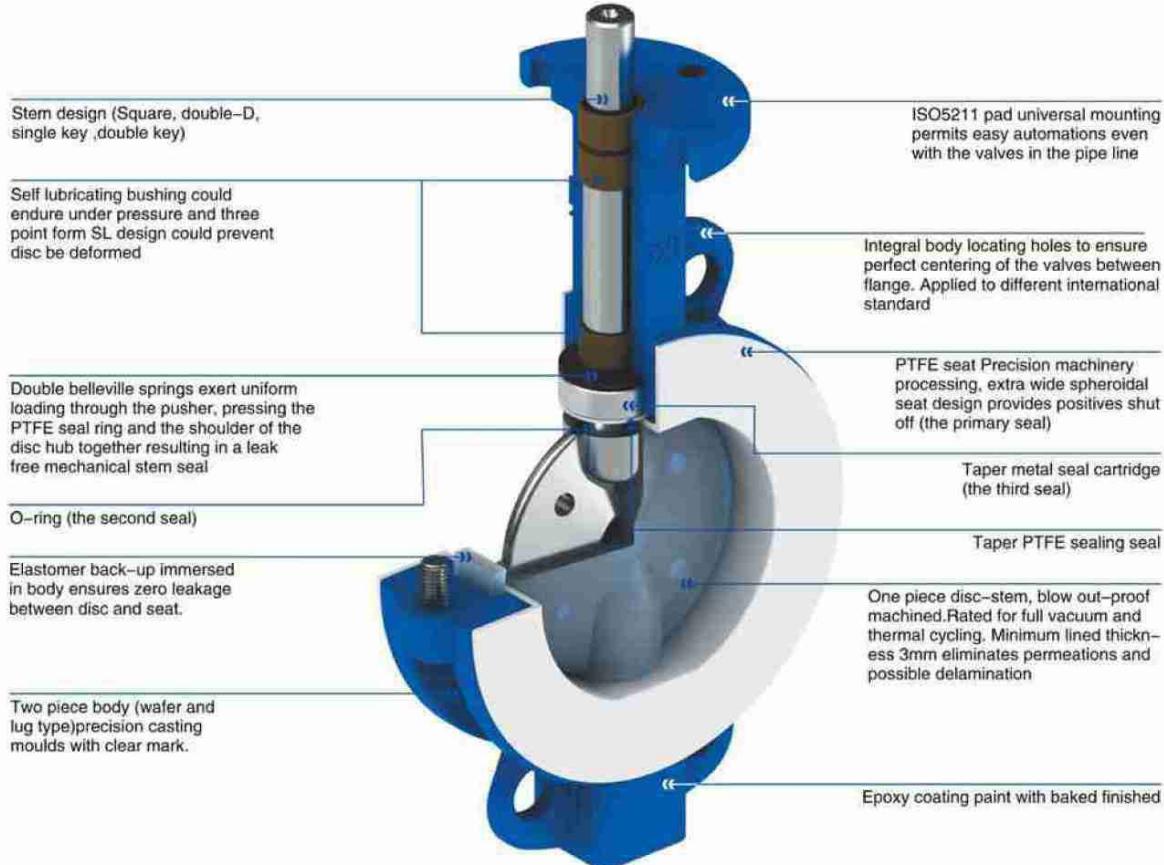

The upper and lower positions of the seal ring, where the stem passes through, use a triple seal design to prevent leakage to the atmosphere.

Triple Seal Prevent Leakage

Primary Seal: ① Seat

Secondary Seal: ② O ring

Tertiary Seal: ③ Taper PTFE seal ring

Lined diaphragm valve

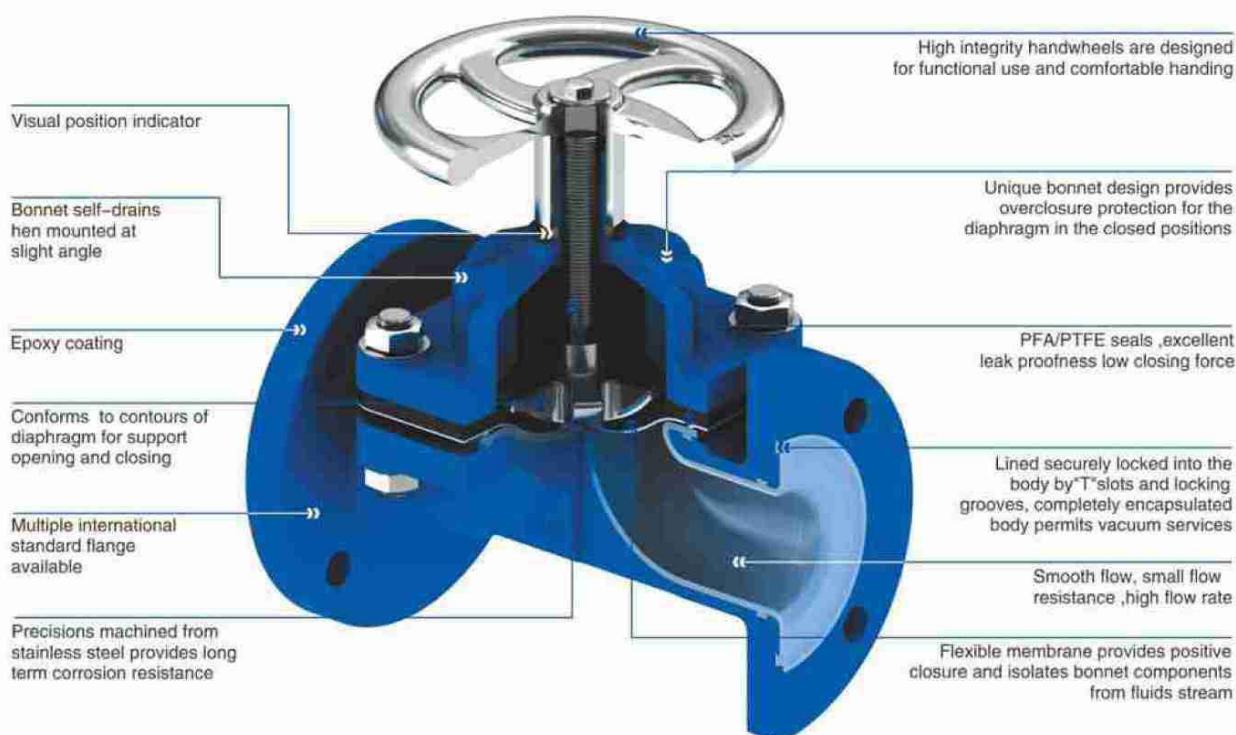

| | |
|------------------------|---|
| Size | 15mm~300mm (0.5"-12") |
| Working pressure | 0,1mbar-16 bar |
| Temperature range | -20° C ~ 200° C according to working conditions, other temperatures on request. |
| Design and Manufacture | MSS SP-88 |
| Face to Face | ASME B16.10 DIN 3202 JIS B2002 → Manufacture Std. |
| Flange Ends | ASME B16.5 DIN 2532 JIS B2212 |
| Visual Inspection | MSS Sp54 |
| Testing | API 598 DIN 12569 JIS B2003 |
| Pressure & Temperature | ASME B16.34 |
| Operator Type | Hand wheel/Pneumatic |
| Spark testing | 14kv |

■ Lined diaphragm valve

Weir type diaphragm valve having rugged design to incorporating the best material available is proved by easy, smooth and maintenance free operation for a long time. Extra heavy-duty casting affords high resistance to atmospheric corrosion. Diaphragm valve reduces diaphragm travel for extended service and fine control.

A wide choice is available for body materials, body linings, types of operation and body end connections to satisfy the needs of most industrial applications. High quality standards are strictly maintained, each valve being checked for size, design pressure, operation, MOC, finish etc and within house painting.

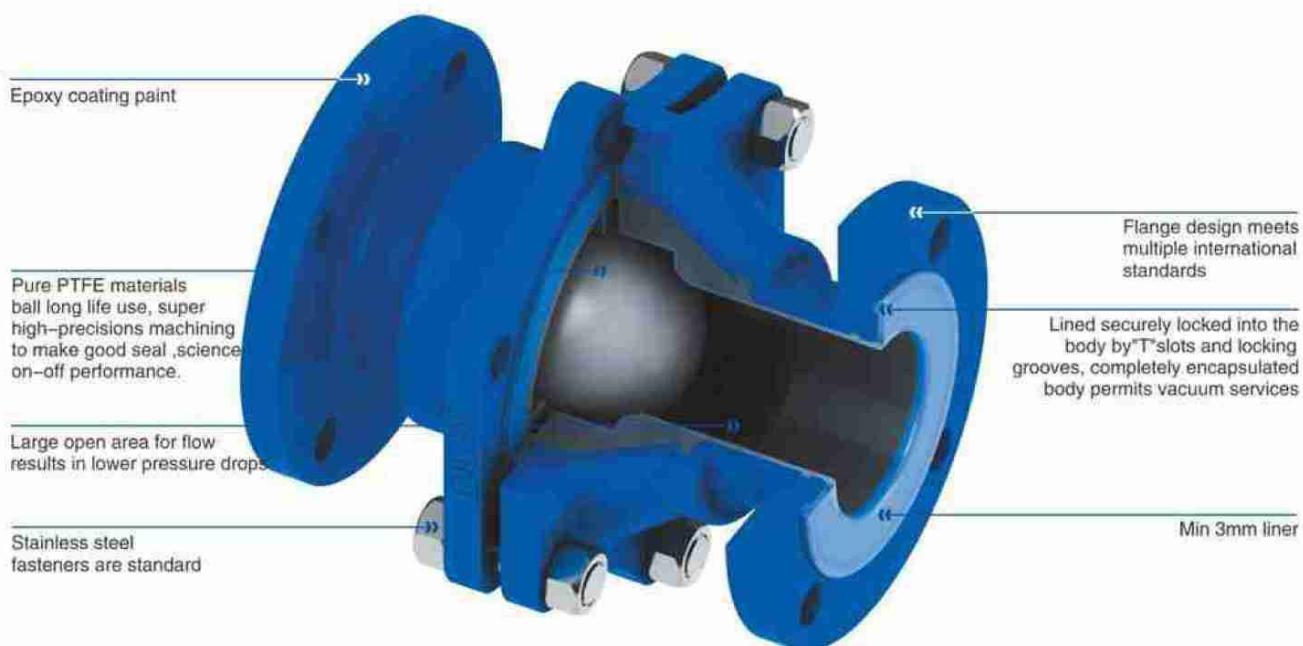

Lined ball check valve

| | |
|------------------------|---|
| Size | 15mm~200mm (0.5"~8") |
| Working pressure | 0.1mbar~16 bar |
| Temperature range | -20° C ~ 200° C according to working conditions, other temperatures on request. |
| Design and Manufacture | API 594 |
| Face to Face | ASME B16.10 DIN 3202 JIS B2002 |
| Flange Ends | ASME B16.5 DIN 2532 JIS B2212 |
| Visual Inspection | MSS Sp54 |
| Testing | API 598 DIN 12569 JIS B2003 |
| Pressure & Temperature | ASME B16.34 |
| Spark testing | 14kv |

■ Lined ball check valve

The ball check valves are developed for use on fluids compatible with the corrosion resistant characteristics of virgin PFA. These valves can be used in horizontal and vertical installations. The body of the valve is made from a combination of ductile iron and steel. The body parts do not come into contact with the process flow.

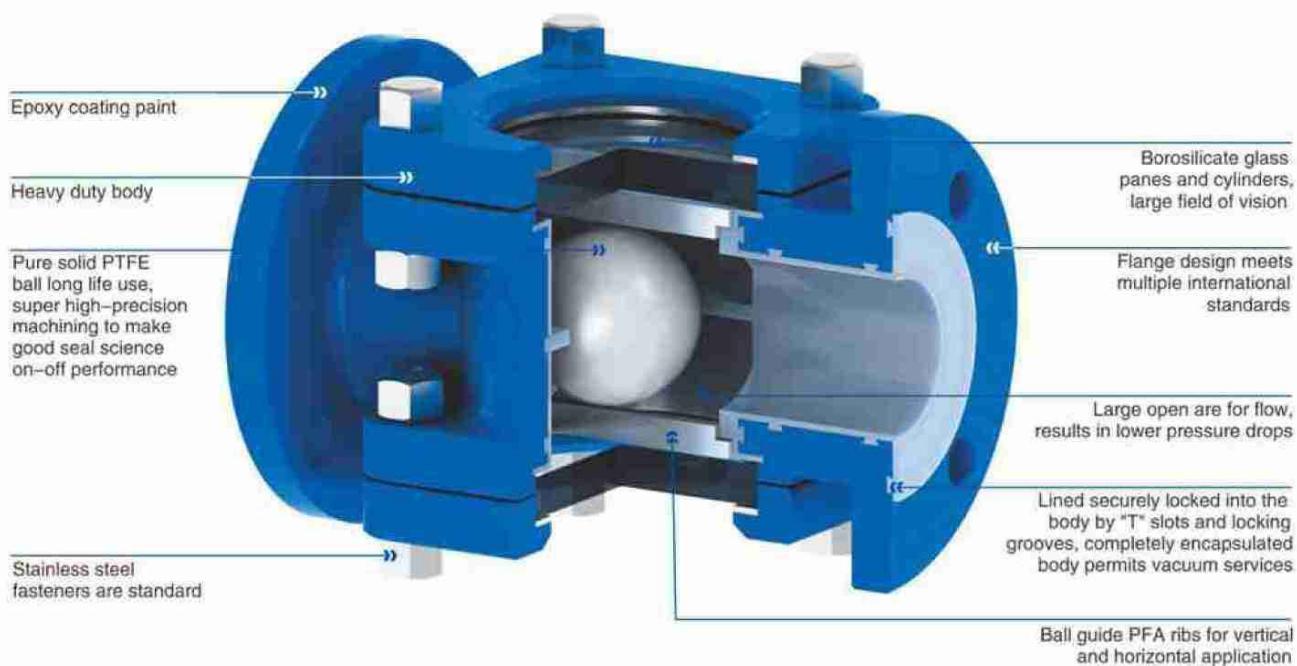

Lined ball check sight glass valve

| | |
|------------------------|---|
| Size | 15mm~200mm (0.5"-8") |
| Working pressure | 0.1mbar~16 bar |
| Temperature range | -20° C ~ 200° C according to working conditions, other temperatures on request. |
| Design and Manufacture | API 594 |
| Face to Face | ASME B16.10 DIN 3202 JIS B2002 |
| Flange Ends | ASME B16.5 DIN 2532 JIS B2212 |
| Visual Inspection | MSS Sp54 |
| Testing | API 598 DIN 12569 JIS B2003 |
| Pressure & Temperature | ASME B16.34 |
| Spark testing | 14kv |

■ Lined ball check sight glass valve

With pressure rating up to 19 bargs, the ball check valves sight glass are very robust, having integrated borosilicate windows each side of the ball check assembly makes it very easy to see if there is flow through the valve. No wetted metal parts are used. The valves are immune to most aggressive chemicals and are used in place of expensive exotic alloys.

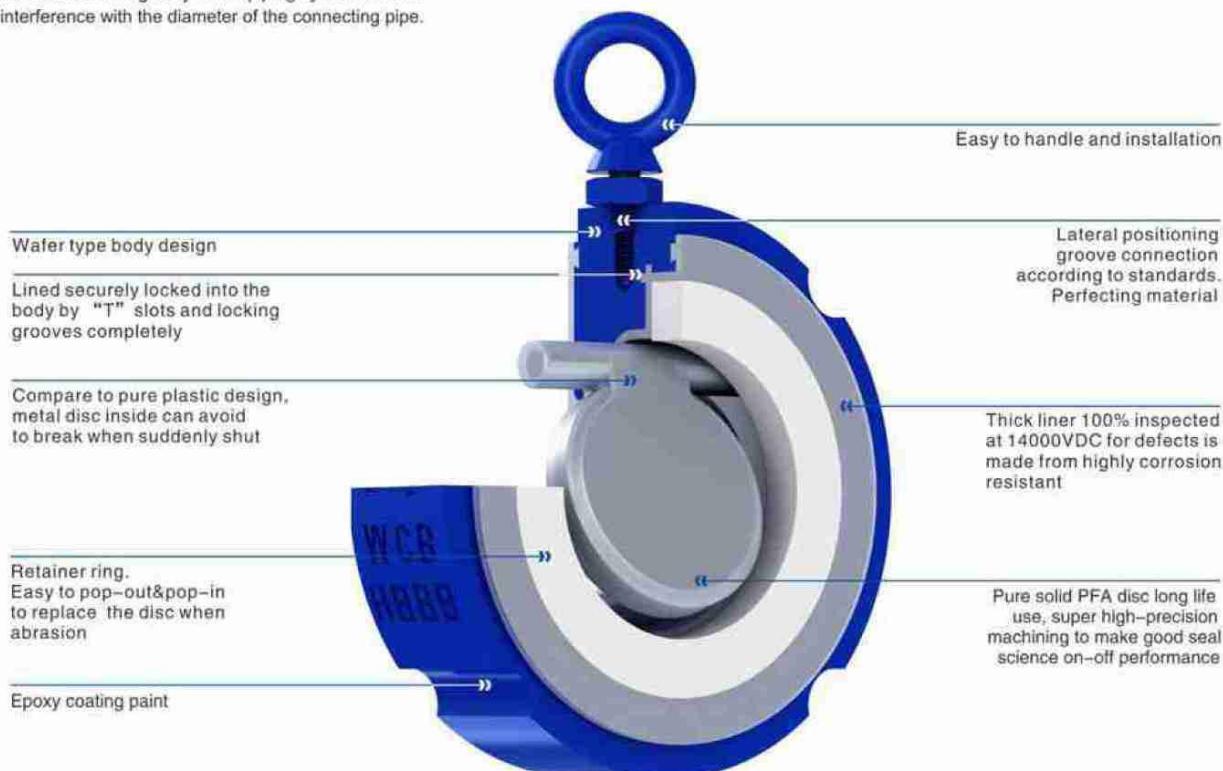

Wafer type swing check valve

| | |
|------------------------|---|
| Size | 40mm-600mm (1.5"~24") |
| Working pressure | 0.1mbar-16 bar |
| Temperature range | -20° C - 200° C according to working conditions, other temperatures on request. |
| Design and Manufacture | API 594 |
| Face to Face | DIN EN 558 ASME/ANSI B 16.10 |
| Flange Ends | DIN EN 1092 ANSI B 16.5 |
| Visual Inspection | MSS Sp54 |
| Testing | API 598 DIN 3230 JIS B2003 |
| Pressure & Temperature | ASME B16.34 |
| Spark testing | 14kv |

Wafer type swing check valve

Fully lined swing check valves are ideal for use in highly corrosive applications due to the universal chemical resistance of fluoropolymer lining. These valves can be used in horizontal and vertical installations due to the special design of the hinge pin, which enables the disc to achieve a seal without support of any system pressure. 2-Piece design eliminating a potential leak path with a seat face integrated in the body liner to seal against the disc in the closed position. The disc can swing freely within piping system without interference with the diameter of the connecting pipe.

Diaphragm Valve

Lined diaphragm valve

Lined diaphragm valve

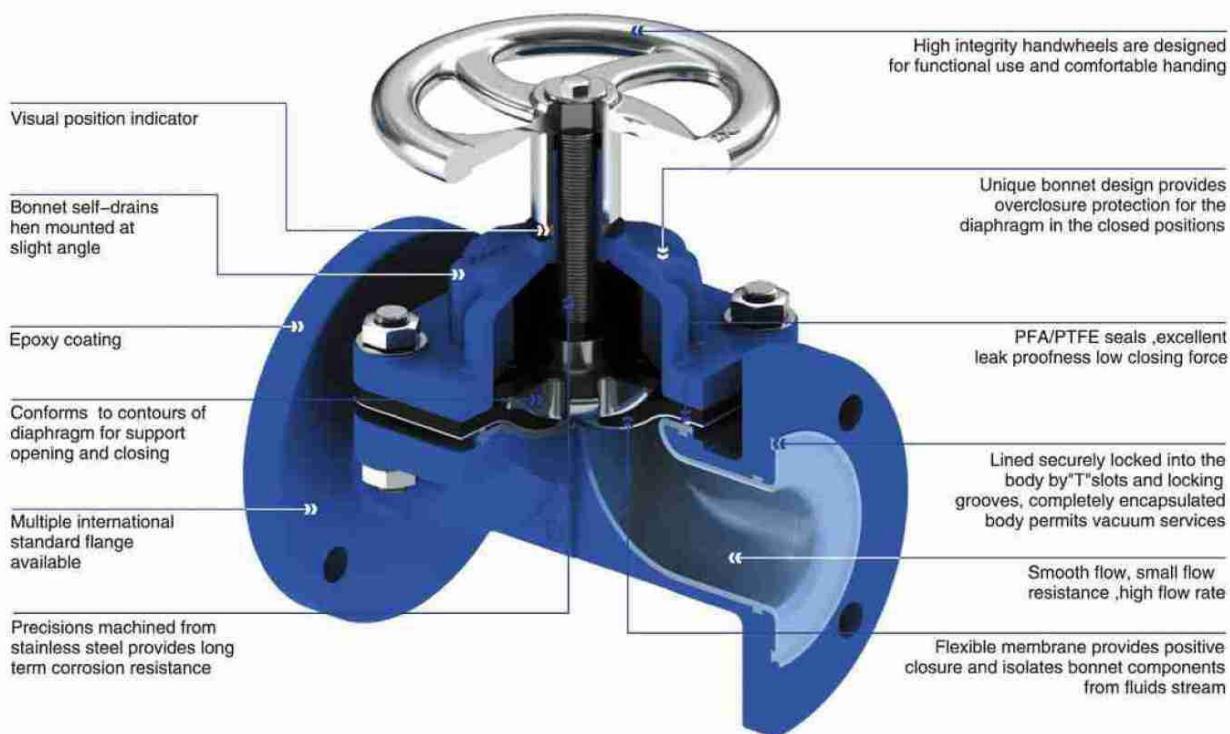

| | |
|------------------------|---|
| Size | 15mm~300mm (0.5"~12") |
| Working pressure | 0.1mbar~16 bar |
| Temperature range | -20° C ~ 200° C according to working conditions, other temperatures on request. |
| Design and Manufacture | MSS SP-88 |
| Face to Face | ASME B16.10 DIN 3202 JIS B2002 |
| Flange Ends | ASME B16.5 DIN 2532 JIS B2212 |
| Visual Inspection | MSS Sp54 |
| Testing | API 598 DIN 12569 JIS B2003 |
| Pressure & Temperature | ASME B16.34 |
| Operator Type | Hand wheel/Pneumatic |
| Spark testing | 14kv |

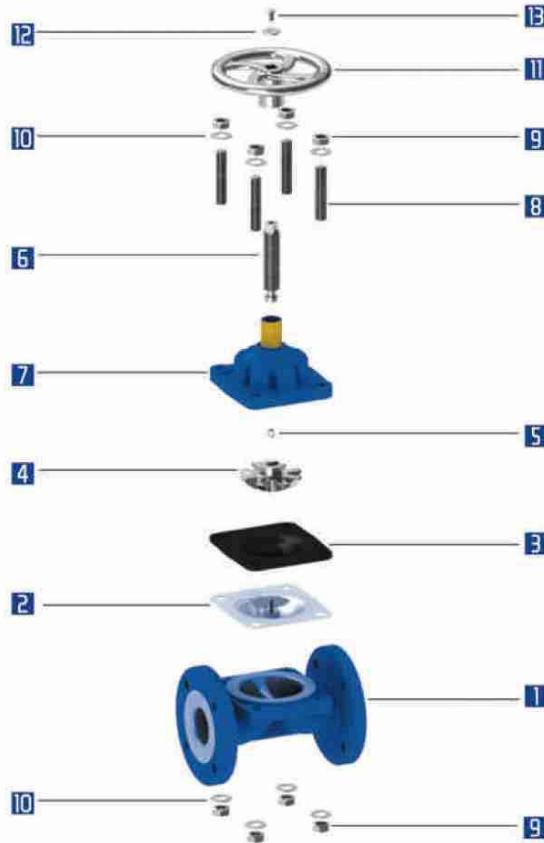

■ Lined diaphragm valve

Weir type diaphragm valve having rugged design to incorporating the best material available is proved by easy, smooth and maintenance free operation for a long time. Extra heavy-duty casting affords high resistance to atmospheric corrosion. Diaphragm valve reduces diaphragm travel for extended service and fine control.

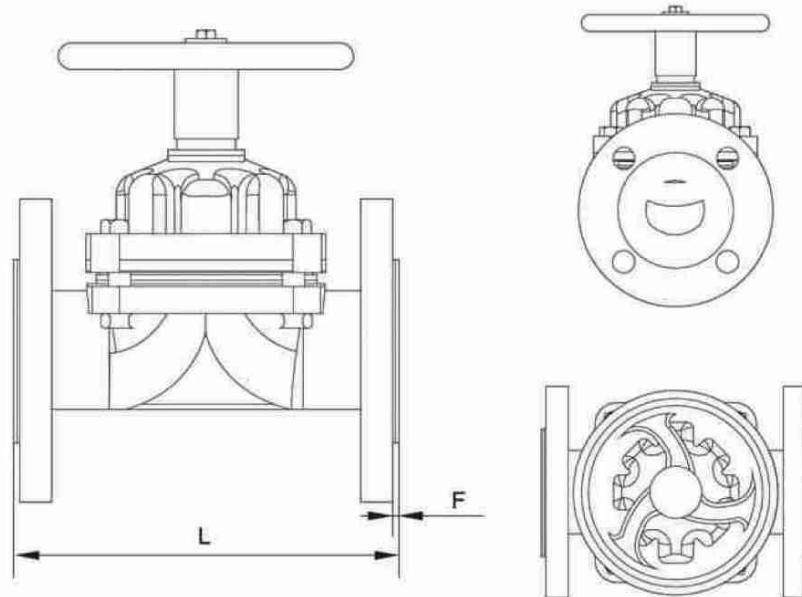

A wide choice is available for body materials, body linings, types of operation and body end connections to satisfy the needs of most industrial applications. High quality standards are strictly maintained, each valve being checked for size, design pressure, operation, MOC, finish etc and within house painting.

■ Lined ball check sight glass valve

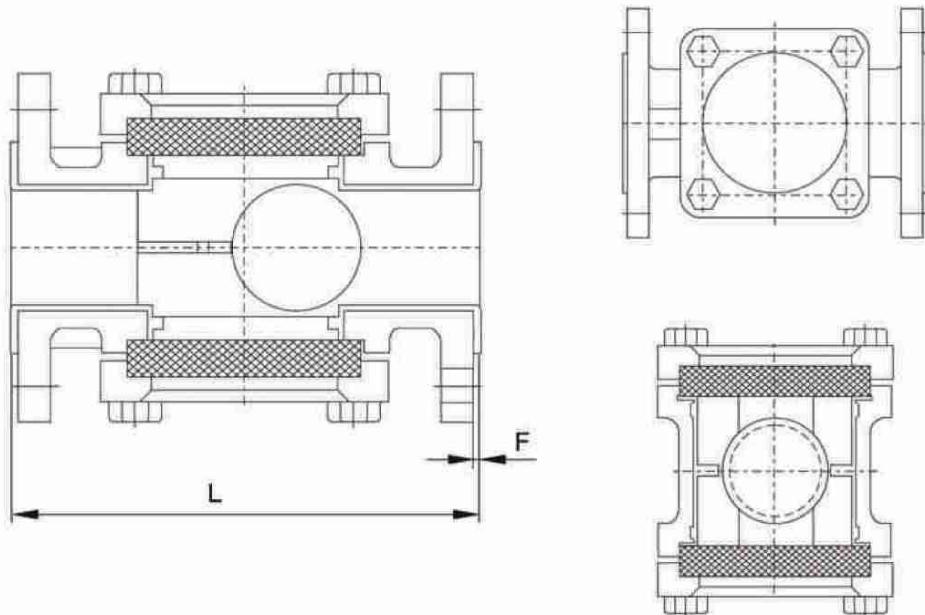

With pressure rating up to 19 bargs, the ball check valves sight glass are very robust, having integrated borosilicate windows each side of the ball check assembly makes it very easy to see if there is flow through the valve. No wetted metal parts are used. The valves are immune to most aggressive chemicals and are used in place of expensive exotic alloys.

| Pressure & Temperature | ASME B16.34 |
| Spark testing | 14kv |

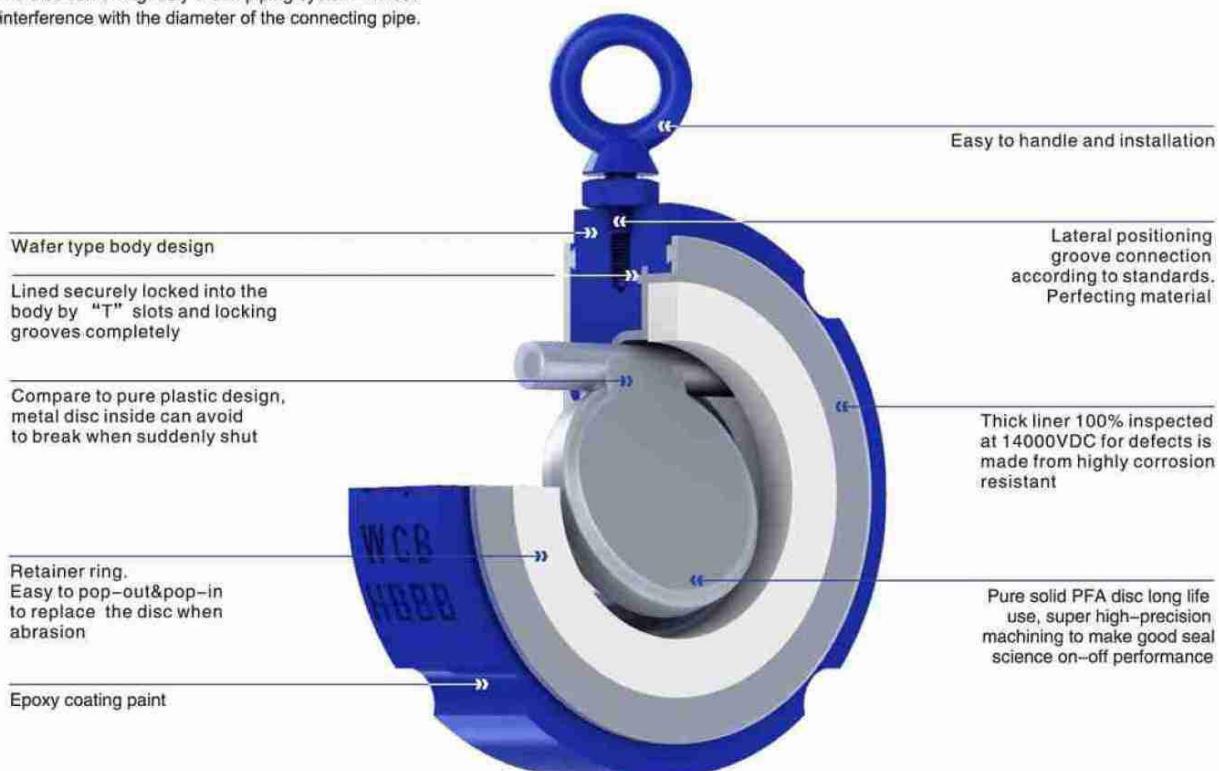

■ Wafer type swing check valve

Fully lined swing check valves are ideal for use in highly corrosive applications due to the universal chemical resistance of fluoropolymer lining.

These valves can be used in horizontal and vertical installations due to the special design of the hinge pin, which enables the disc to achieve a seal without support of any system pressure.

2-Piece design eliminating a potential leak path with a seat face integrated in the body liner to seal against the disc in the closed position.

The disc can swing freely within piping system without interference with the diameter of the connecting pipe.

■ Lined plug valve

Straight through lined plug valves provide unrestricted flow when fully open, and are also operable in a throttled position. The moulded liner assure excellent chemical resistance and long service life.

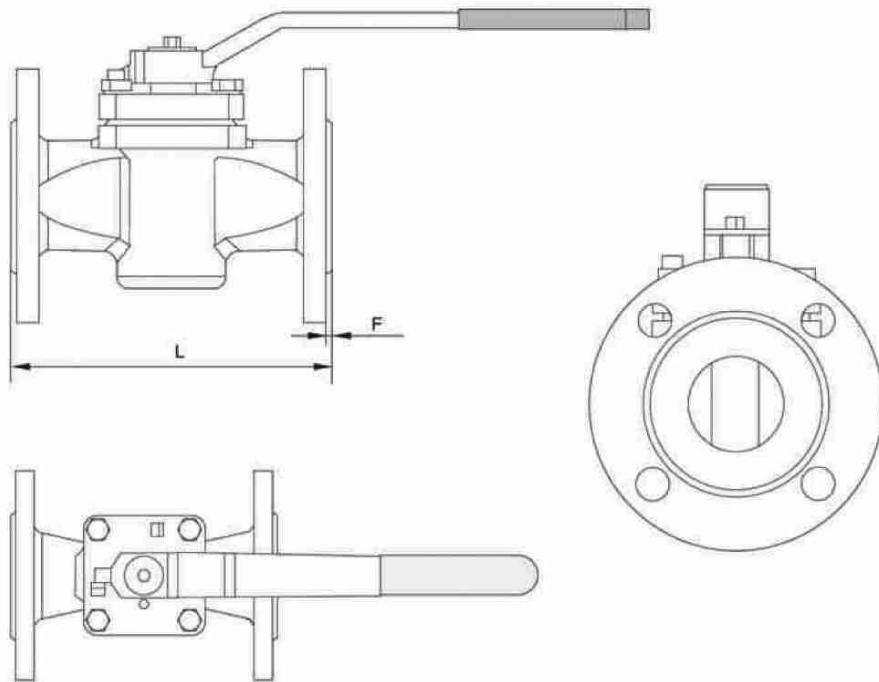

Products are manufactured using latest production methodology backed by continuing quality control form raw materials to finish products to ensure the highest possible quality standards.
